

## *Product Information - Biologicals*

### ECO Natural Non GMO Biological Product Offerings

#### **NXC Odor Control Products for Bulk and Surface Application**

**NXC Odorenz Products-** NXC Odorenz products are custom designed for application into solid or aqueous phases of odor generating materials. The products act to eliminate odor and prevent odors at the source.

NXC also offers a range of enzyme and activated biologicals for nearly any application where odor is an issue

Dosage range is highly dependent on a number of physical factors including reaction time, temperature, pH and other factors; NXC representatives will test as necessary to determine product and dosage.

**NXC Surface Active Treatment-** the products are true odor neutralizers and are designed for use where surface applications need immediate odor neutralization. NXC can combine enzymatic action with odor absorbents and neutralizers to eliminate odor at the source.

Depending on your particular application, we can design a product that will eliminate odors before they ever get out.

**NXC Trapenz Products** – NXC Trapenz products are customized formulas for applications in industrial and institutional grease traps and lift stations. Unlike many competitive products we believe one size does not fit all and customize a product for the specific issues that need attention.

Dosage range is highly dependent on a number of physical factors including reaction time, temperature, pH and other factors; NXC representatives will test as necessary to determine product and dosage.
